

Zabrze, 31st October 2020

Recommendation

I hereby confirmed that in the period from **01/05/2020** to **31/10/2020** Estra Automotive System Sp. z o.o. located in Zabrze, cooperated with **SoftCube Limited Liability Company** located in Wałbrzych, represented by **Mr. Tomasz Żak - President of the Management Board**. The scope of cooperation was the project of the software implementation, responsible for supervision, production and shipments in sequence (JIS5000) to several BMW plants (customer of Estra).

During the above-mentioned period, the project was carried out personally by Mr. Tomasz Żak. Despite the difficulties encountered during the implementation (including changing the software supplier), the project was implemented on time, in full functionality required by our client, which was confirmed by the positively passing the BMW test procedure and by the execution of the first shipment in accordance with the requirements of JIS5000. The entire project was carried out in a professional manner, with full progress control and an appropriate response to any deviations from the plan. Mr. Tomasz Żak reliably and professionally supervised the implementation process at its every stage, while demonstrating flexibility in terms of the provisions of the contract, adjusting the scope and methods of cooperation to the project requirements.

Due the above, I am pleased to assess the cooperation very positively, while recommending the company SoftCube Sp. z o.o. as a reliable, committed and timely cooperator.

Estra Automotive Systems Poland Sp. z o.o.

Dariusz Bizacki
Plant Manager
